

# Macopharma Press Release

Friday March 20, 2020

## **COVID-19 Macopharma Business Continuity**

The world is currently going through a major crisis with unprecedented impacts and implications. In this context, we are committed to provide continuous service to our customers and to support a safe work environment for our employees during this complicated period.

First and foremost, Macopharma will keep as its first priority the well-being of the patients and healthcare practitioners who use our products around the world. We will work diligently to ensure we continue to provide the highest standards of Quality and Safety to all who use our products.

In these difficult times, our Group is holding daily assessment meetings to update the situation and ensure all necessary actions, under our Business Continuity Plan. These meetings enable us to keep constant visibility on possible bottlenecks and issues, and to enact appropriate contingency plans as required.

Our Company is also strictly adhering to all recommendations and instructions received from Health Authorities in France, in Poland and in Tunisia where our main sites are located to protect our staff and secure day to day operations. All Macopharma employees worldwide have access to secure remote working technology and collaboration tools, allowing them to continue to work off-site.

We must however consider that transportation and movement of goods may be impacted by various actions from Healthcare Authorities around the world. This may include a number of new controls and restrictions on access, and could potentially create delays on shipments.

We will keep you informed of developments as the situation evolves. Do not hesitate to reach out to us with any questions

We would like to wish each and every one of you to stay safe and healthy in these challenging times. Together we will overcome this challenge and live in a safer world afterwards.
